

Manual Lift Kit

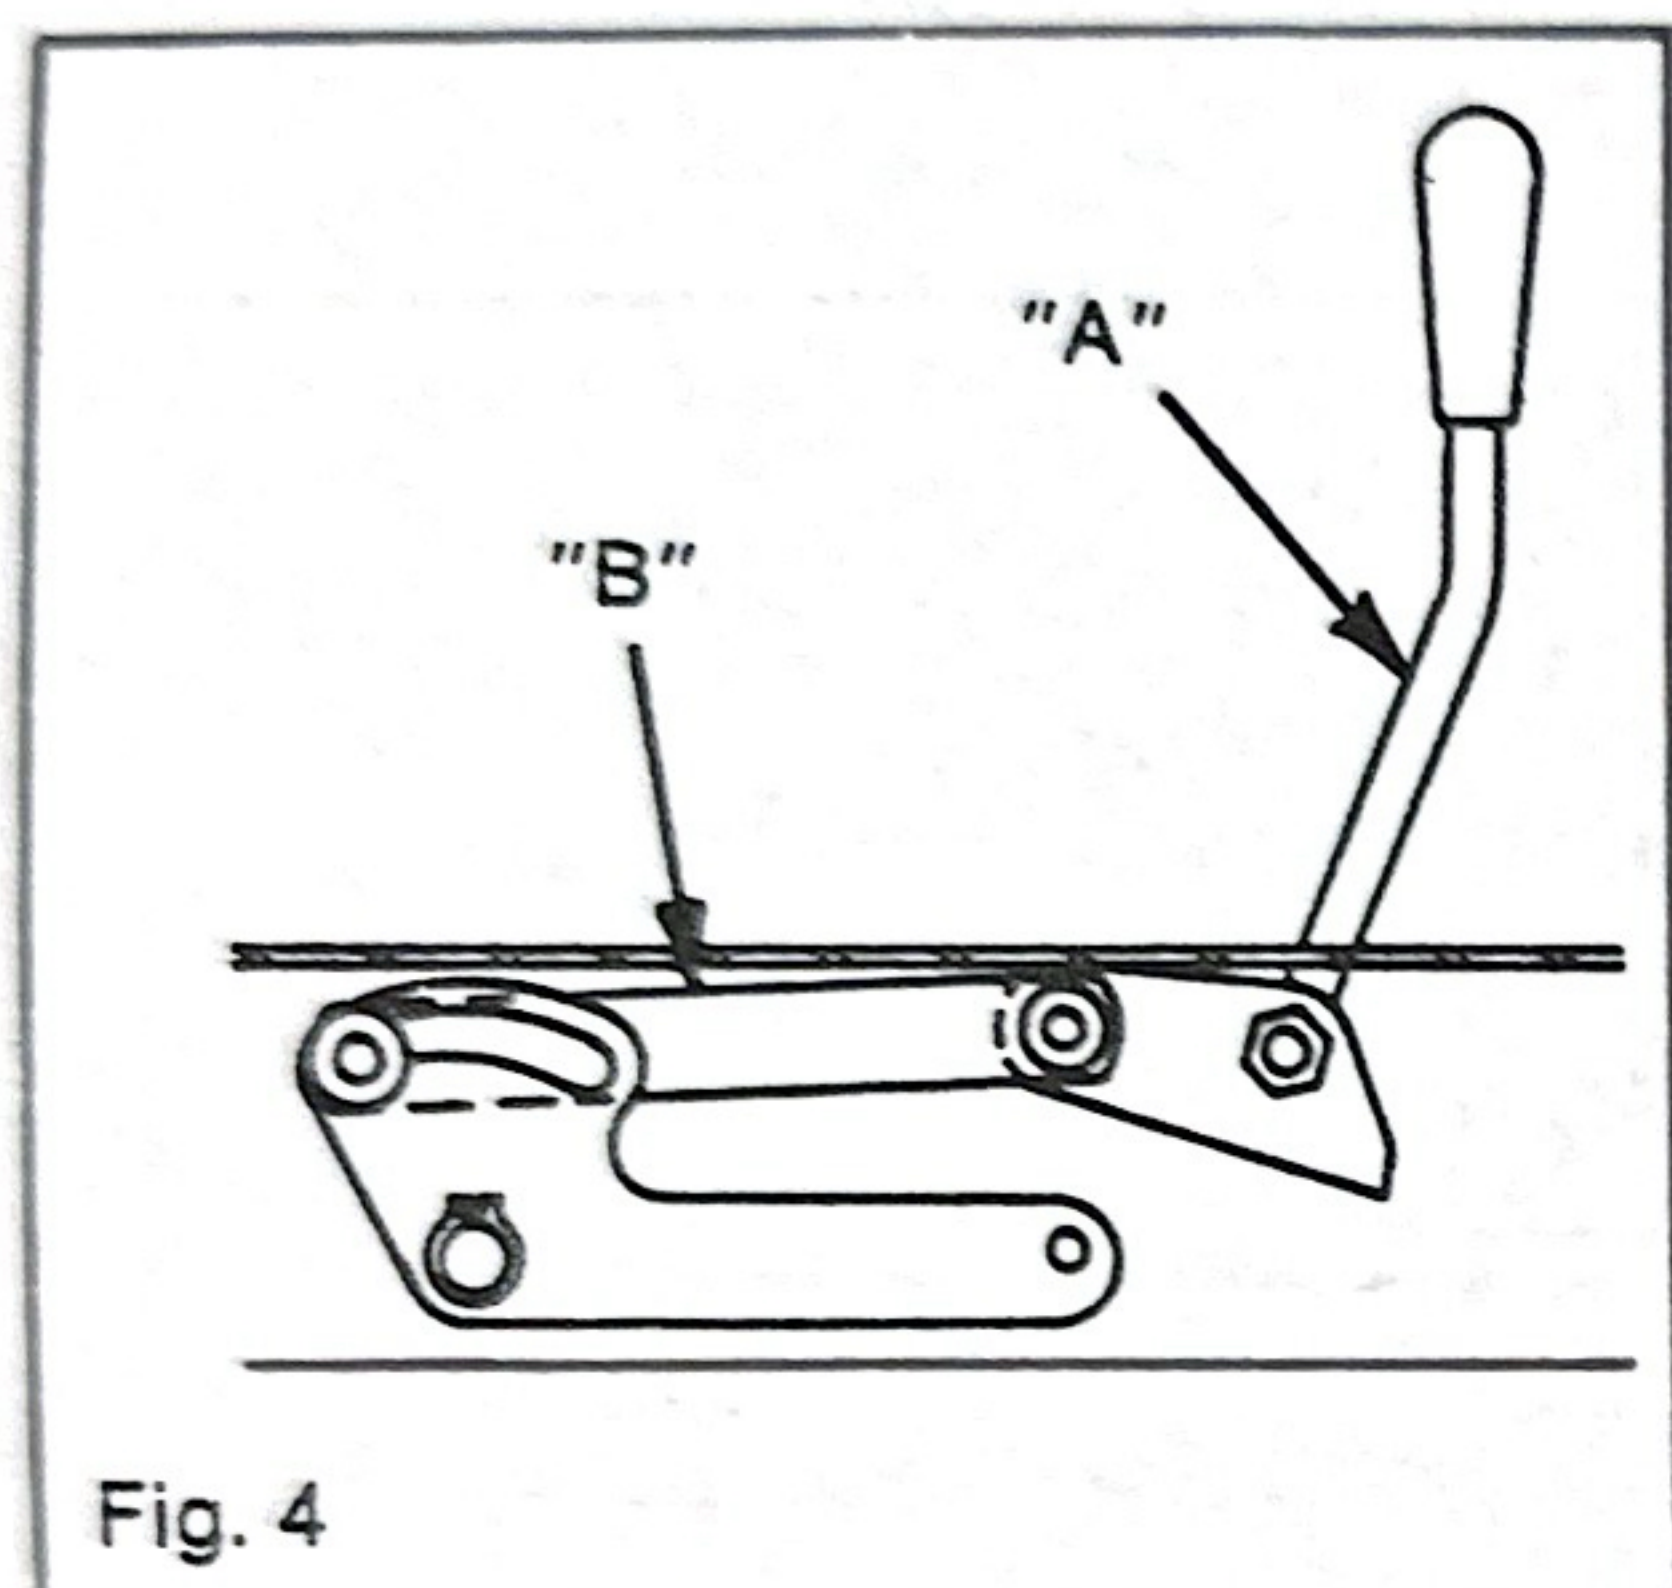

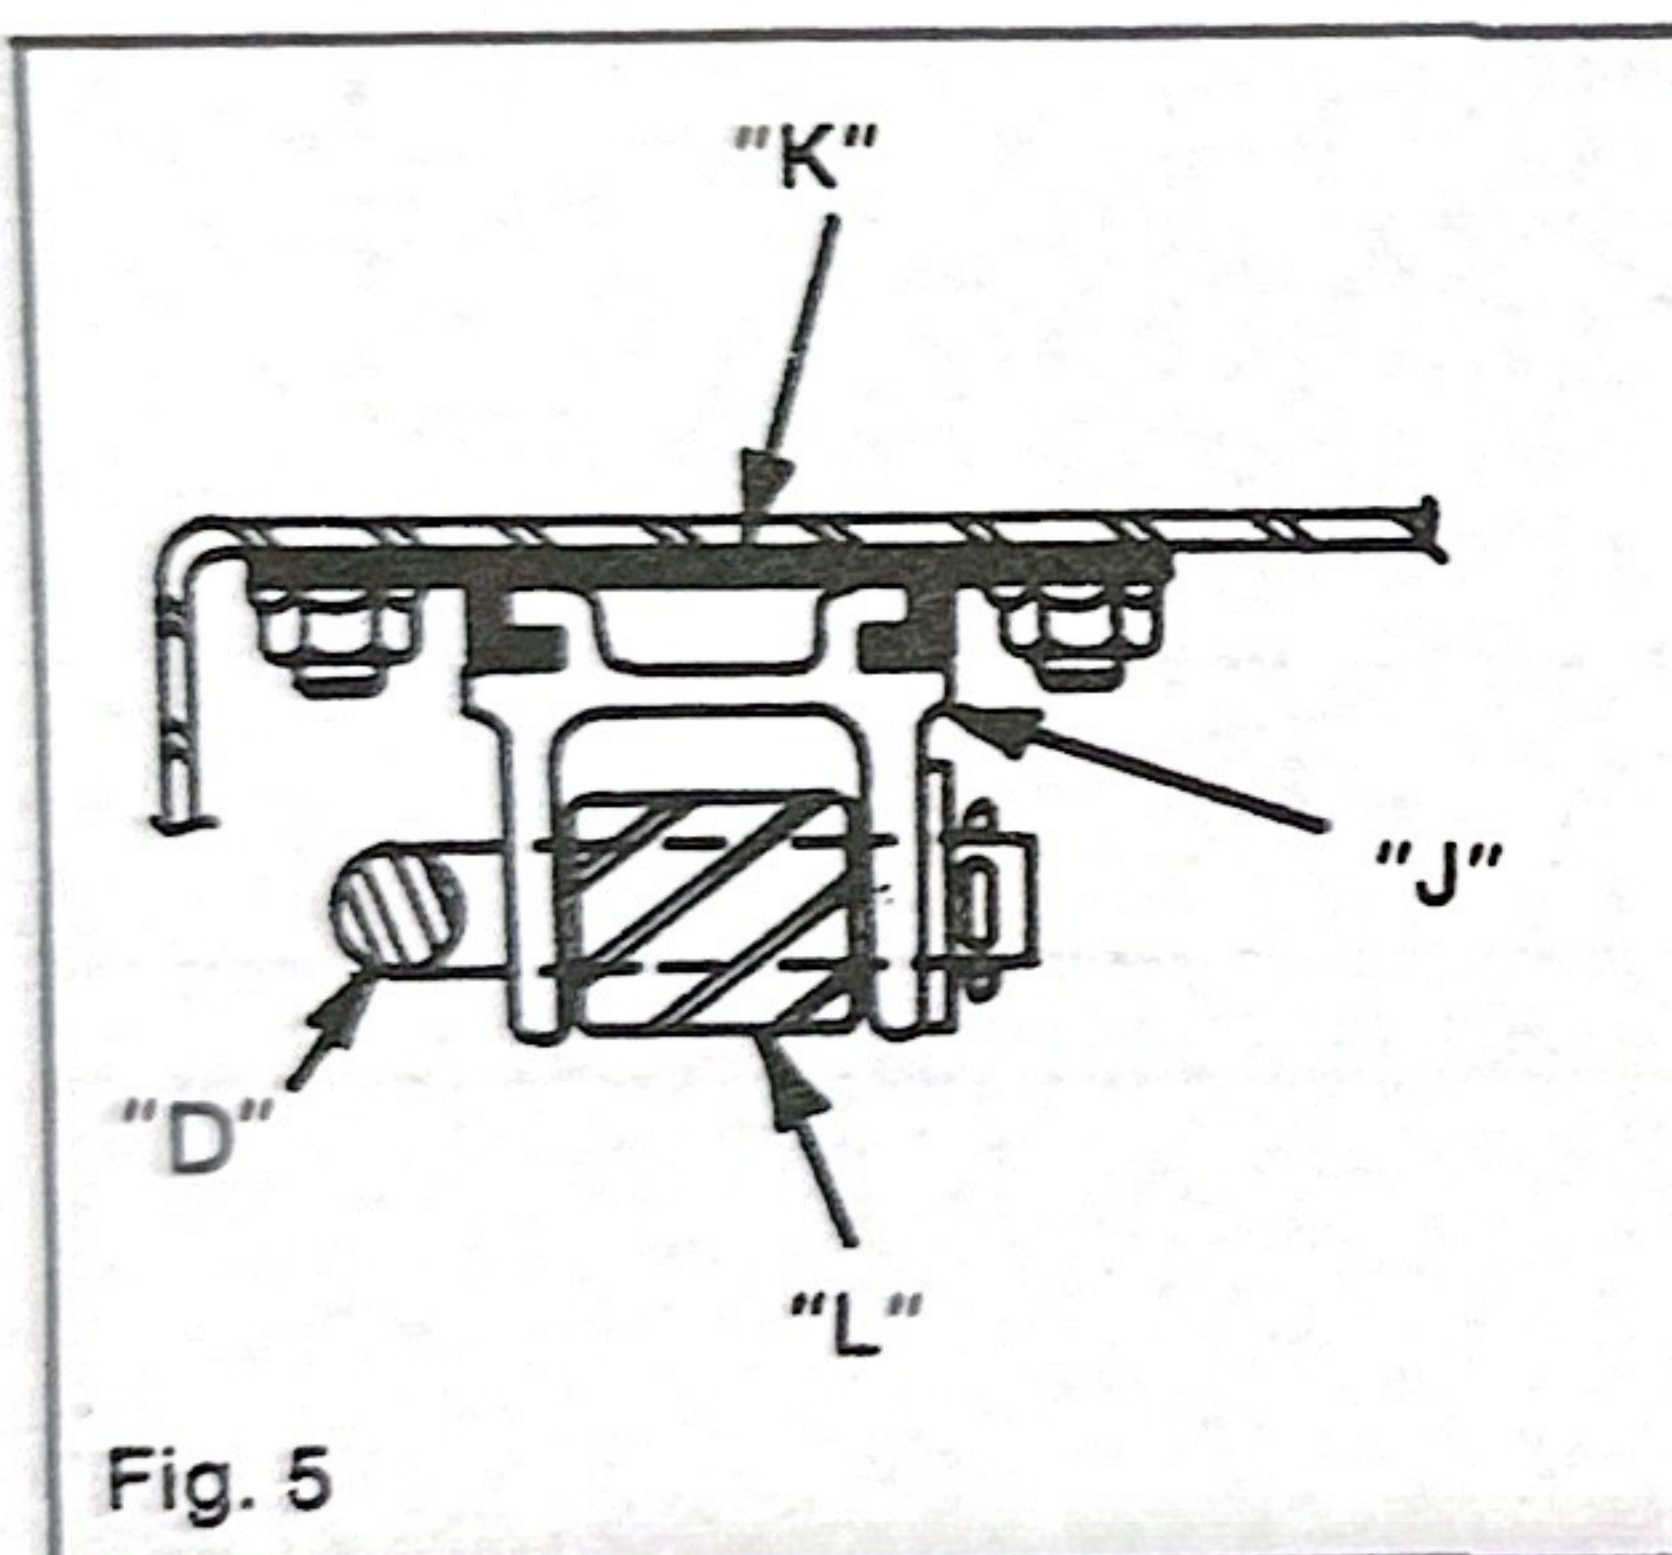

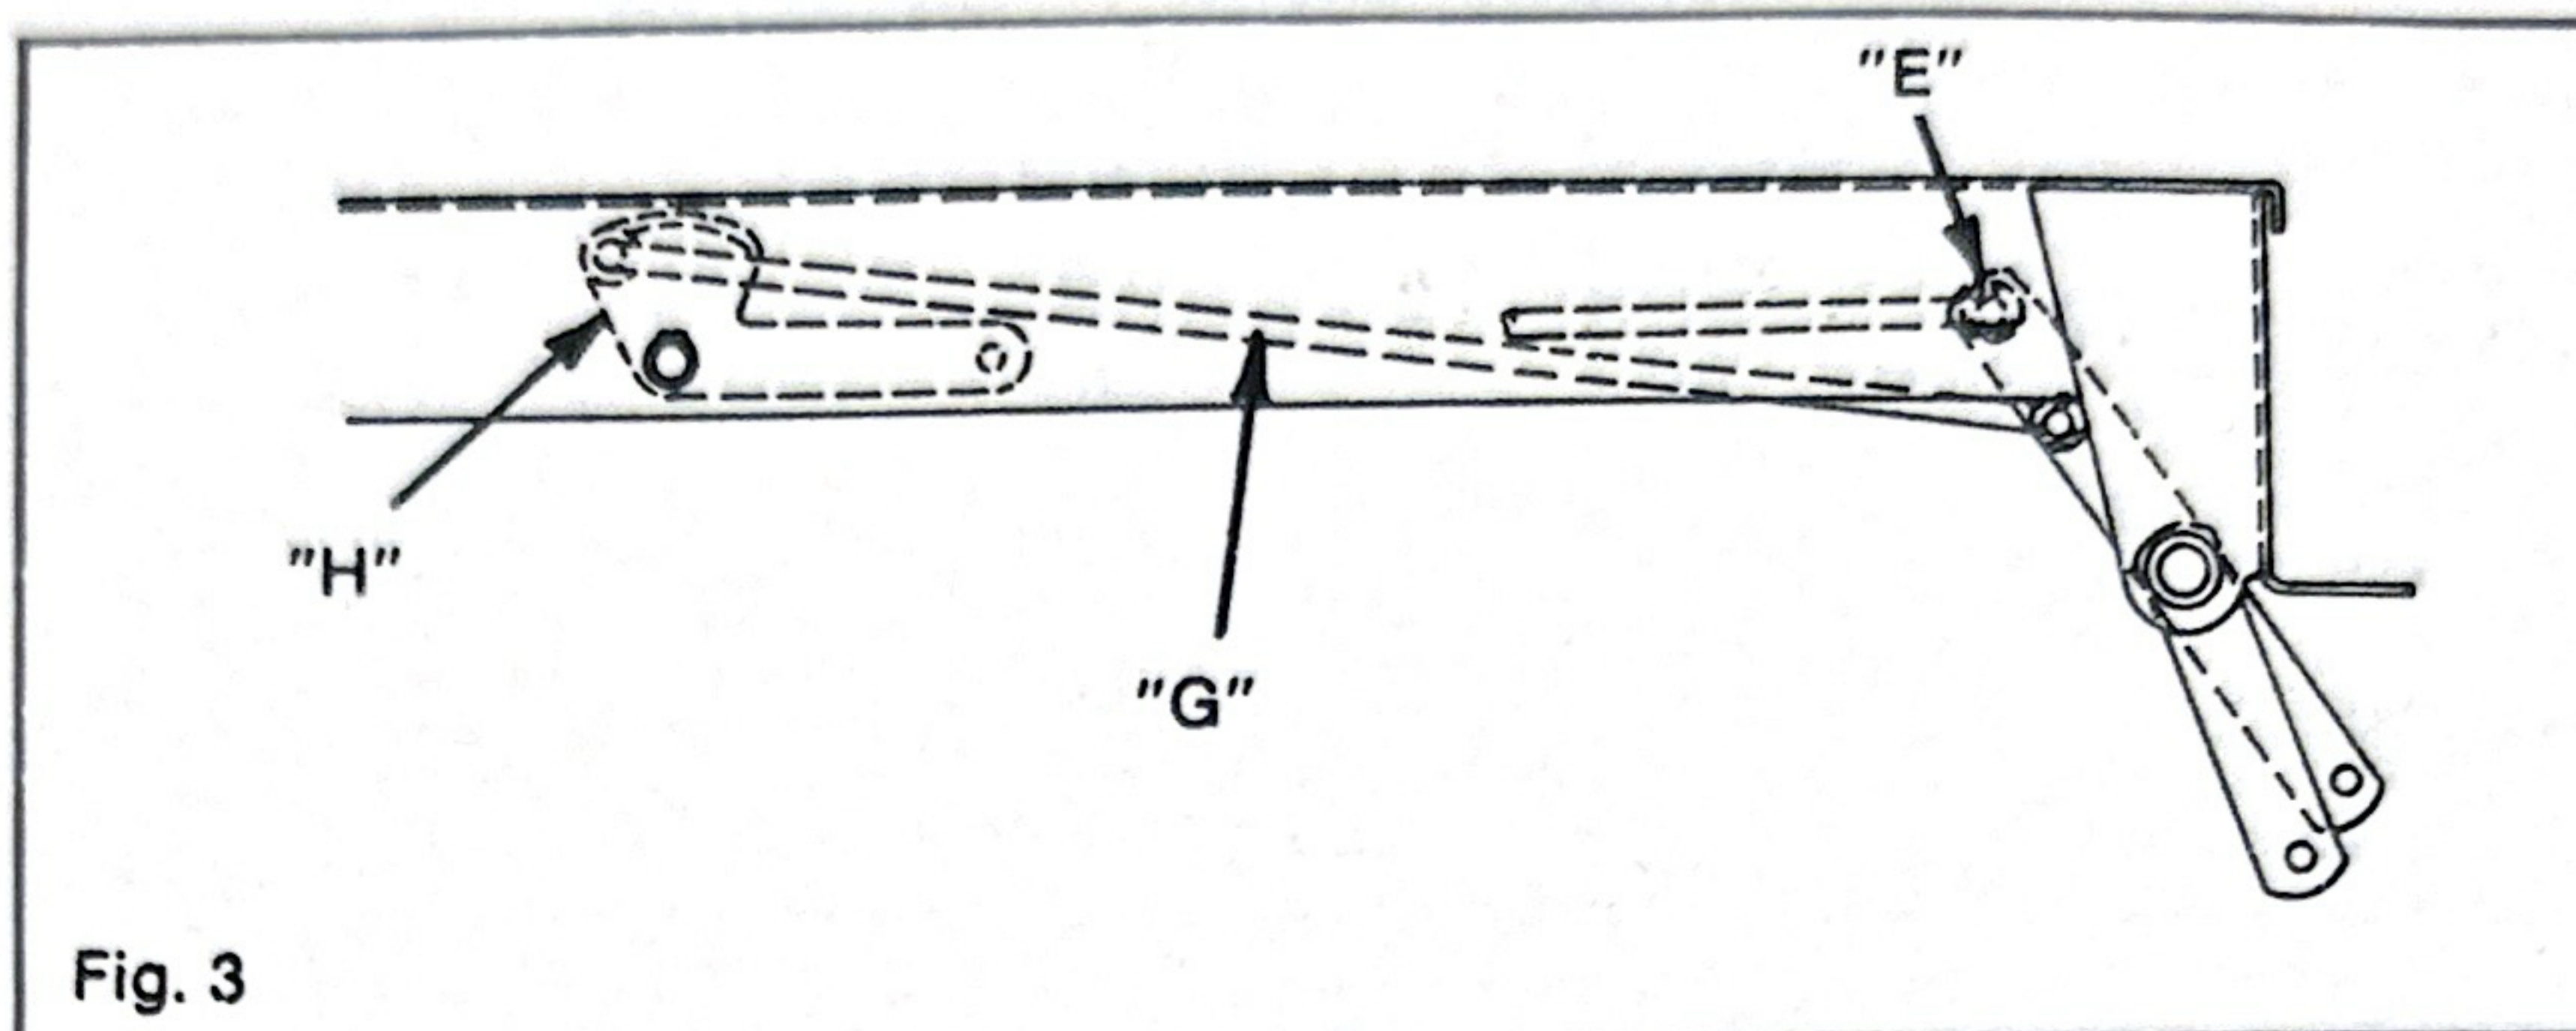

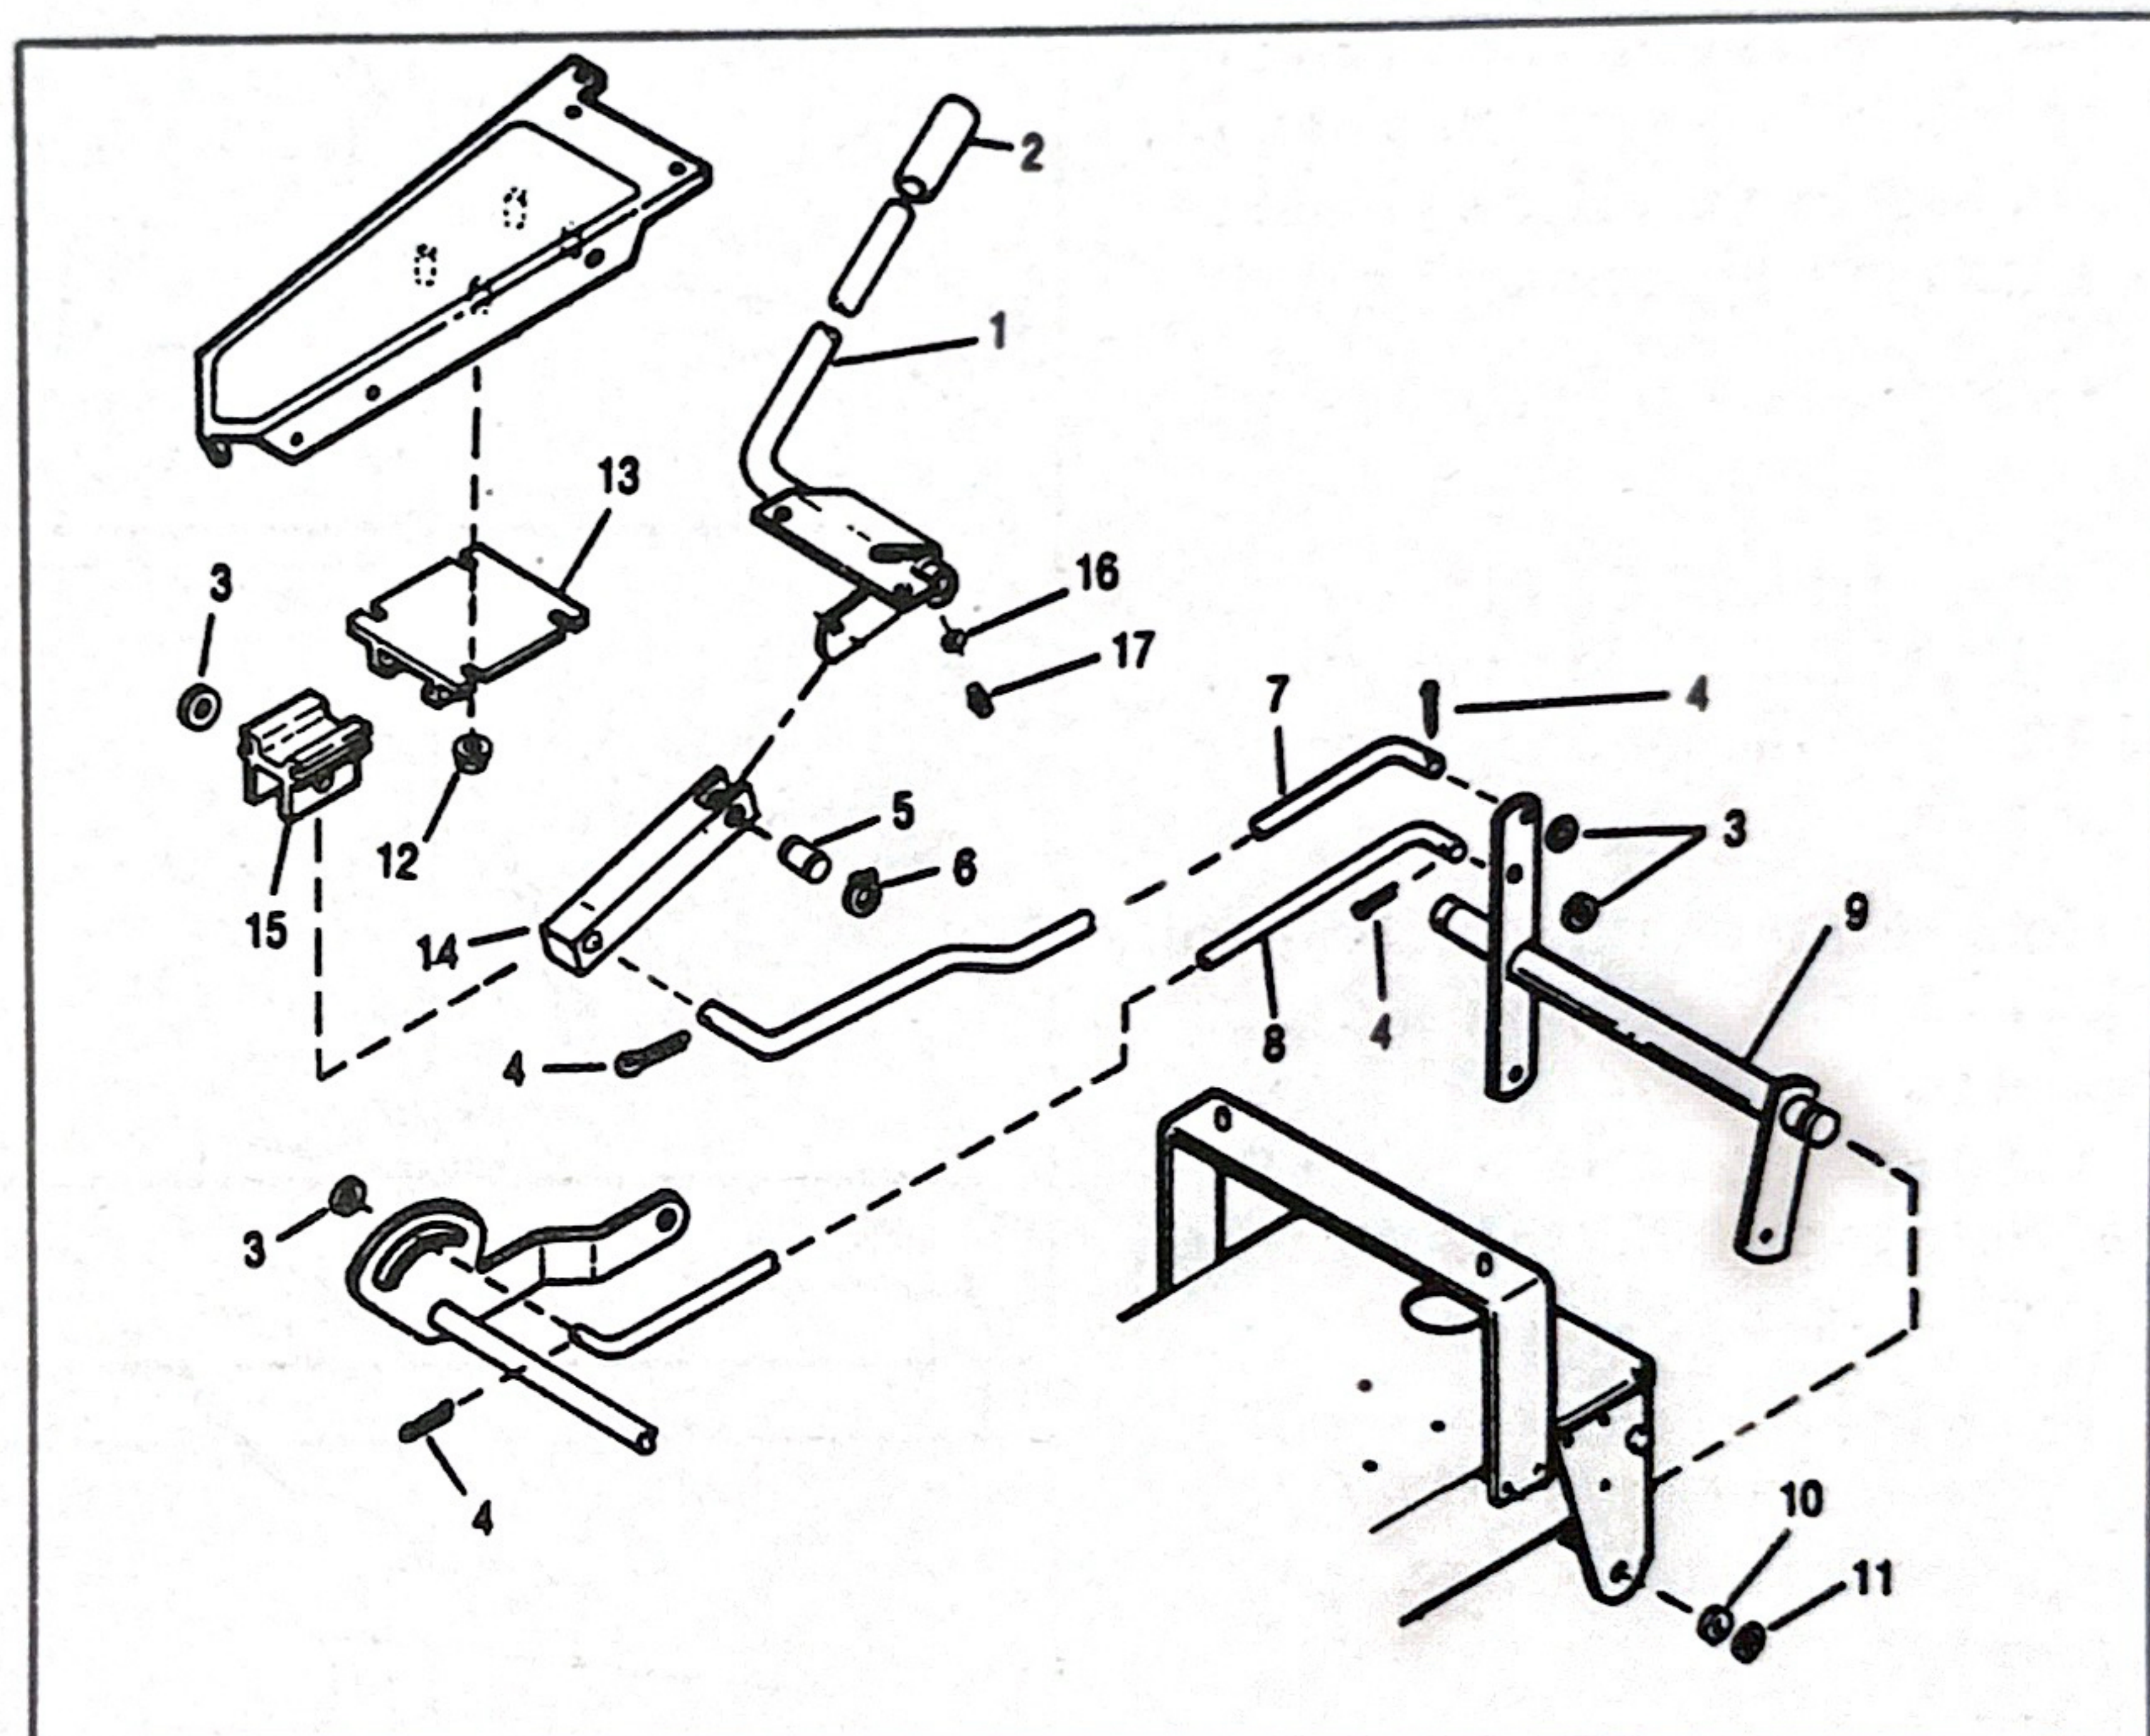

Model 30909

Installation

1. Remove the manual lift handle (A), Fig. 1, and lift link (B) from frame.
2. Install the new handle assembly to top side of the foot rest using the existing hardware. Screws must be installed from the bottom up.
3. Remove the rear hitch support (C), Fig. 2, from the frame.
4. Secure lift rod (D), Fig. 2, to top hole (E), Fig. 3, of lift shaft using (1) 1/2" flat washer and cotter pin as shown.
5. Route lift shaft through holes of (P), Fig. 2, hitch support and secure using (2) 3/4" flat washers on each side and retaining rings. Flat washer quantity may vary due to hitch support width.
6. From the rear route lift rod (D), Fig. 2, through slot (F) of R.H. frame under foot rest. Secure hitch support to frame with existing hardware.
7. Secure lift rod (G), Fig. 3, to lift shaft and present arm (H) using a flat washer and cotter pin. Install the front end first.
8. Place push arm (L), Fig. 1, and 3, between sliding guide (J). Route end of rod (D) thru both parts and secure using a flat washer and cotter pin.
9. Place sliding guide (J), Fig. 5, into slot of stationary guide (K).
10. Fasten this complete assembly to the underside of the foot rest with (4) flange screws.

11. Secure arm (R), Fig. 1 and 2, of lift handle to push rod (L) with (2) retaining rings and (1) pin.
12. Install handle grip to end of lift handles.
